 ? Derwent Abstract: **(KR2015163A) Novelty - Silica gel containing mixed indicators includes a mixture of methyl orange and bromocresol green or a mixture of methyl red and bromocresol green. By using this silica gel, the progress of water absorbed to the silica gel can be readily judged by a viewer. Detailed Description - An INDEPENDENT CLAIM is included for a method of preparing the above silica gel containing mixed indicators, by preparing a silica gel and incorporating mixed indicators having a discoloring region in an acid condition to the silica gel in an acid condition. The acid condition can be achieved by using the silica gel as produced or by adding an additional acid solution after washing the produced silica gel. Use - Silica gel. Advantage - The novel silica gel contains mixed indicators which makes it possible for a viewer to monitor the progress of water absorbed to the silica gel with the naked eye and which can be prepared in a simple method.**
